

# Process for training in Paediatric Emergency Medicine sub-specialty

1

•As early as possible, trainee contacts TPD or Head of School to seek support in principle.

2

•Trainee is appointed to approved post following UK-advertised competitive selection. This need not be in own deanery.

3

•Trainee, current TPD and host TPD (if different) agree timetabling (see timetabling options).

4

•Trainee contacts College to advise of PEM training with dates  
• *training@collemergencymed.ac.uk*

5

•College acknowledges sub-specialty training to trainee and deanery and confirms new expected completion of training date.

6

•During training, trainee attends annual PEM Training Days.  
•Next PEM Training Days: 20 & 21 June 2013.

7

•At the first ARCP post completion of PEM training deanery signs off successful period of sub-specialty training.

8

•As part of the College's completion of training application form, the trainee's Head of School signs off each part (6 months Paediatric ED, 3 months Ward Based Paediatrics and 3 months Paediatric ICU/Anaesthetics) of the sub-specialty training section.

9

•If the College's HST Lead approves all completion documentation, the College recommends the trainee to the GMC for EM CCT (or CESR-CP) with PEM as a sub-specialty.
