**Subject:** DSH patient

Just a note to let you know of something that happened last night as I fear there may be some come-back. Sorry no to speak to you but I had to be away promptly.

A patient Josepine McEvoy came in at 22:30 last night after an overdose. Richard (FY2) saw her but she refused treatment and left. We were going to phone her GP and CPN this morning but she was brought back at 3 am after jumping off a bridge onto the motorway. The trauma team was called. her injuries were : bilat compound tib & fib fracture, dislocn lumbar spine (no neurology) and left radius & ulna.

I'll talk to you about it next week when I'm back.

Geoff.
