

Dear Doctor

My son was treated badly in Casualty. He is blind and it is your fault.

Callum is 2 years old. I took him to Casualty on October 1st in the evening he had a temperature and was sick and crying. A doctor told us he did not have a temperature and was not crying and could go home. He said he had a virus. I took Callum home and he cried all night he was hot, was sick 6times and was sleepy in the morning. I hones the GP. He said I must take him to Casualty strait away.

A children's doctor saw Callum and took him on the wards quickly. Callum had special care because he had a brain infection. Because of this he is blind.

Callum was very good at drawing and football. He doesn't understand why he cant do this now. I know it is because the doctor in Casualty did not treat him right. He has destroyed Callum's life. I will speak to a solicitor.

Yours sincerely

Kaybe Aire
